Terms of use.Excellent image quality. Lighted controlpanel buttons. Cons Relatively low brightness. Weak printed documentation Bottom Line 3M has made a splash with its entry into the digital data projector market. Pininfarina design combined with quality and attention to detail make this a strong competitor right out of the box. The projector could be brighter, but it should still suffice for most conference rooms. Both owe their stylish appearance to the legendary Italian design firm, Pininfarina. Click here to read the. SEE ALSO The Best Portable

Projectors for 2020 Both owe their stylish appearance to the legendary Italian design firm, Pininfarina. But its not just another pretty face The SVGAresolution LCD projector aggressively competes in the entrylevel market. One of the most impressive features is a circular base that makes aligning an image properly on a screen incredibly easy—no more fumbling with screwtype feet adjustments. Though its a little bulky for A single RGB connector handles computer connections. A serial port allows remote control of the projector, but its use is not documented in the manual. The S10 also features a full complement of video connectors. It maintained excellent focus throughout the screen and excellent gray shade response at both ends of the spectrum. Convergence was very good. There were faint, fine bars in the color ramps, but colors were good.

The S10 delivered only 813 lumens on our tests—sufficient for a moderatesize image in a room without too much ambient light. All told, the Bravo S10 has attractive styling, innovative design features, excellent image quality, and a competitive price.
